

# Harbor Watch

A Water Quality Program

## Is your watershed group looking to expand into water testing? We can help!

Services available:

- Design of a water quality monitoring program for your watershed based on sound science
- Volunteer training in proper field collection techniques
- Laboratory analysis of water samples for fecal coliform and *E. coli* bacteria
- Consultation on data analysis and remedial actions

Please contact Sarah Crosby, Director of Harbor Watch, for additional information and pricing.
